

CSF-201 Citrix Content Collaboration Enterprise Essentials

Overview

In this course, students will learn about enterprise file sharing and synchronization with Citrix Content Collaboration. Students will gain the skills and understanding needed to configure and manage your Citrix Content Collaboration environment, including implementation of StorageZones and the Windows and Citrix Virtual Apps and Desktopclients. Additionally, explore your control plane and data storage options; end-user management; and client deployment on Windows physical and virtual desktops. This course will give students an understanding of Content Collaboration administrative responsibilities and teach students how to navigate the administrative console for facilitated deployment and file sharing success.

Prerequisites

- CXD-203 Managing App and Desktop Solutions with Citrix XenApp and XenDesktop 7.6
- CXD-300-61 Deploying App and Desktop Solutions with Citrix XenApp and XenDesktop 7.6

Prerequisite Comments

It is recommended students have a basic understanding of: Windows Server administration, Citrix Virtual Apps and Desktops, Microsoft Exchange and Outlook, and Basic Enterprise File Synchronization and Sharing.

Target Audience

Built for IT Professionals interested in learning how to implement Citrix Content Collaboration features using leading practices.
Potential students include Administrators, Implementers/Engineers, and Architects.

Course Objectives

Understand Enterprise File Synchronization, Sharing, and Citrix Content Collaboration architecture
How to navigate the Citrix Content Collaboration administration interface and build StorageZones
How to integrate Citrix Content Collaboration in an existing Citrix Virtual Apps

and Desktops environment
How to manage Citrix Content Collaboration users in an Active Directory environment

Course Outline

1 - Enterprise File Synchronization and Sharing (EFSS) Overview

Enterprise Document Sharing Use Cases
Software as a Service (SaaS) and Cloud concepts
EFSS Legal Basics

2 - Architecture

Control Plane
Data Storage Options (Azure, Amazon, Enterprise)
Security (File Encryption, Password Policy, DLP Overview)

3 - Administration

Folder Administration
Advanced Preferences
Manual User setup

4 - StorageZones

Components data flow
Restricted Zones Overview
Connectors Overview (CIFS, SharePoint)

5 - User Management

ShareFile User Management (UMT) Tool
Security Assertion Markup Language (SAML) Overview
ShareFile Authentication

6 - Endpoint clients

Windows and XenDesktop and XenApp Client
Mobile Clients
Outlook Plug-in

7 - User Experience

Getting Started
File Management
Preference Customization

8 - Troubleshooting and Management

Authentication and Access Issues
Component upgrade
Component monitoring
